### Stellar Fragment

"A philosopher once asked, "Are we human because we gaze at the stars, or do we gaze at them because we are human?" Pointless, really..."Do the stars gaze back?" Now, that's a question."

*Neil Gaiman, Stardust*

## Just What Is Your Sun Sign's Gift to Planet Earth, Part 3

By Lesley Francis

**Libra** – First of all, I just have to say I couldn't have done it all by myself. I mean truly. Whatever contribution is made it takes at least a village, if you know what I mean. Anyway, it's not polite to single yourself out. It makes other people uncomfortable, makes them feel less than. Ok, if you insist! There's at least a couple of things I've brought to Earth. Good manners and the win-win approach. There I said it. I hope it doesn't sound too self-congratulatory.

**Scorpio** – Why are you bothering me? Get that microphone out of my face. And put those note pads away. My thoughts and opinions will remain just that. Mine. They are not for general consumption. If you can't figure out the answer to that question all by yourself, what makes you think it's my job to help you. The truth is if you were really interested you could dig up the answer yourself. Try it. Besides I'm busy in my own little world. After all, you could be interrupting the resolution of centuries of why, why, why!

**Sagittarius** – Well, if it wasn't for me, life would be the size of a postage stamp. No looking beyond the end of your nose, no desire to experience the totality of existence. Instead, it would be just a bunch of yahoos, content to push the dirt around in their own little backyards. Without me, no one would ever go anywhere or do anything interesting. And they certainly wouldn't care to ask What-Is-It-All-About? I always have to prod the rest of humanity to take an interest in the world around them. So there you have it. TWO gifts -- adventure and the search for meaning.

**Stay Tuned for Part 4 tomorrow**
