Just What Is Your Sun Sign's Gift to Planet Earth, Part 2

By Lesley Francis

Cancer – I made Earth a home. I mean, just look at the shape the Earth was in before I came along. Everybody was running amok doing their own thing with no place to really feel safe and no one to feel connected to. It was a big challenge but I had a three-pronged attack. First, get people to pitch the shelter concept for the idea of home. Then, invent family. You know that warm, fuzzy bond. Finally, transform food from a necessity to a comfort, to a pleasure. Earth really got the full meal deal with me.

Leo – Is that even a question? I should think it's obvious. Me, of course. What greater gift is there? Besides, nobody told me I had to bring a gift. I am always generous, you know. After all when the Sun rises and sets in, well dare I say it, my backyard, it's obvious I've got a multitude of gifts. Now before you decide that I have some sort of complex, I just want to ask you. What's wrong with liking yourself? The Earth would be a better place if everybody did it.

Virgo – Well, I think you might have phrased the question a little differently. It's too broad. It leaves too much room for interpretation. So I think you should go back to square one and improve the question. By gum, that's it. My gift is improvement – self-improvement, home improvement, improvement, improvement, improvement. I am just so giddy I figured it out without months of analysis paralysis. You know almost anything can be made better. Even the mouse trap and, don't tell anybody, Windows.

Stay tuned for Part 3 tomorrow & Part 4 on Tuesday
